

Nowadays, the use of **hybrid or online formats** for language teaching is becoming part of the new norm. In this workshop, **ELC Ed Tech Coordinator and ESL instructor Austin Kaufmann** will share his knowledge and experience about **key principles to integrate the use of technology in an online language course**. He will also talk about **how different educational tech apps and tools can be incorporated efficiently** in synchronous as well as asynchronous sessions so that online language classes become an interactive and meaningful experience for both teachers and learners. At the end of this session, you will also have the **opportunity to ask Austin more questions** to find out more information about this topic!

Sponsored by SOSLAP (Student Organization of Second Language Acquisition and Pedagogy)
